

# Step 5 - Building your Course

Please find listed below the recommended actions that you need to take during this step of implementation and ensure your course is setup ready for your Course Play events:

## Assess Your Course

*Decide on 9 holes on your course which are best suited to use for your Course Play events. Remember to consider design and accessibility.*

## Build Your Academy Tee Course

*In order to build the 5 Stage teeing system, you need to build Tee 5 (Academy Tee) course setup first. Follow the guidelines below:*

### Follow the Par, 4 & 5 Yardage Guide

*Download this guide from the Course Play resources page showing your the recommended yardage for Par 3's, 4's and 5's.*

### Build the Right Course Combination

*Ideally, your 9 hole course should have a combination of two Par 3's, five Par 4's and two Par 5's to make a Par 36 course.*

### Position the Tee Markers

*Walk the course and identify where best to position the tee markers to ensure the tee box is on a level piece of ground and makes the hole engaging with variation across the holes.*

### Record the Yardages

*Print this resource from the Course Play page on the Training Hub and As you build your Course, record each yardage, Par and draw the starting tee position on the map. This will be used to create your Course Play event scorecards.*

### Add Spray Paint

*If you have a Cart path on your course, spray pain the starting positions on the Cart Path or communicate this to your green-keepers.*

## Build Your Remaining 4 Teeing Positions

*Now you have built your Academy Tee (Tee 5) Course, you can build the remaining four teeing positions. Follow the steps below to utilise the resources in the Hub.*

### Calculate the Yardages

*The yardages of the remaining four starting tees are built using a percentage of the Academy Tee yardage on the hole. Calculate this and add to the Template sheet.*

### Position the Tee Markers

*Talk a walk of the course and identify where each teeing position can be positioned. Once again, position these on a flat piece of ground, create engaging hole layouts but also ensure each position is developmentally appropriate for the age of the child that may be playing from each tee. Add these to your Template Sheet course map.*

### Add Spray Paint

*Spray paint the cart path adjacent to the remaining teeing positions and keep the template sheet somewhere safe for delivery week so you can create your scorecards.*
