

# Step 1 - Scheduling and Planning

Please find listed below the recommended actions that you need to take during this step of implementation for your Super Crush It Challenges event:

## Refine your Event Plan

*The Super Crush It challenge event is an optional component of Social Play Programs and is designed to support the challenge element of your Junior Monthly Program. Please review our recommended schedule steps below critical to implementing your event should you choose to run it at your venue:*

### Discuss Facility Access with your Venue

The event provides an ability for your juniors to attempt all of the challenges within the Swing, On the Green and Around the Green skill categories and therefore you need to have access to each of these facilities to run your event. Discuss with your venue a day/ time where you can gain access and also an area in the club house to run a short award ceremony after the event.

### Recruit Supervisors

You may also want to consider recruiting Supervisors to assist with the event. This could be a young leader who is a member at your club or an older junior enrolled on the program. It could also be an accredited adult supervisor with your club but isn't recommended to be a parent of a junior attending the day.

### Confirm the Start and End Time of your Event

It is recommended that the day will be 3 hours in length giving enough time for the juniors to attempt each of the challenges and move around each of the stations.

### Decide on your Event Date(s)

You have the flexibility to run as few or as many of these events to suit your program. You should schedule the event on a date to maximise engagement from those who are participating in your program.

## Schedule your event on GLF. Connect

The key elements for setting the event on your GLF. Connect system are:

- Select the Junior Social Play program template in the Class Builder
- Add to the Crush It Junior Events and Social Play program filter
- Assign to the Crush It MyGame+ program
- Add the member and non-member pricing for your event
- Add the event places as a maximum of 36
- Set the registration periods in line with when you want to take bookings from your members and customers. This will ensure the event is visible on your online booking system
- Ensure you add the event to each of coaches schedules who will be assisting on the day
- Create a 100% discount code for your Junior Monthly participants to use when entering
- Ensure you assign the revenue that is generated for the event correcting across your coaching team
